

☒ **Bespoke furniture Made from only recycled materials.**

Sleeping Tree is committed to using only recycled materials to create our designs. We not only feel this is ethical but also the materials used add their own character to the pieces. Many of our designs incorporate natural forms created by using seasoned coppice windfall, and drift wood alongside architectural timbers to make one off pieces of furniture. We pride ourselves on making furniture that is as individual as its' owner.

For your home - Sturdy rustic furniture to add a touch of individuality to your garden, patio, or conservatory made from reclaimed materials made to your specification and taste.

Storytelling Chairs - Storytelling chairs made for your home, school or group. Children will love these chairs let their imagination go wild with one of our creations What ever your needs just give us a call and speak to Dean. There are more pictures of our work in our gallery - [Click here](#).

Events - Fantasy, and themed furniture for all your event needs, garden parties, festivals and rituals. All we need are your ideas and the theme of your event and we will make magical pieces to suit your needs.

I started making bespoke furnishings a few years ago now. I kept seeing wonderful materials being left on waste ground by fly tippers not only did it annoy me but gave me the idea that I could get reusable materials and make unique items of furniture from it with an aim to create tactile and aesthetically pleasing pieces . I just cant help myself these days, sides of the road, skips, buildings being demolished materials with character are everywhere. I like to make use of recyclable material before it goes to landfill. I love using these materials the fact they are weathered and beaten gives them a great look which lends itself to be used in making beautiful rustic furnishings . Some people see rubbish I see something with potential.
