

Housewarming of Selby offer an extensive range of

Woodburning and Multifuel stoves from leading manufacturers. Their showrooms boast over 40 Stoves for a variety of uses. Many of our stoves are DEFRA approved and as such are suitable for burning wood in smoke controlled areas. The beauty of burning wood is that it is a carbon neutral cycle. The tree grows and absorbs carbon - the tree is cut and burnt releasing carbon - the tree planted in its place uses carbon to grow and so on..... Given the current concern about global warming and carbon emissions this has to be a good idea.

They have a wide range of traditional and more contemporary Gas and Electric appliances - ideal for those who want the effect but don't fancy bringing in the wood or taking out the ashes. They supply and install stoves from a number of manufacturers including Aarrow Fires, Broseley Stoves, Charnwood, Dunsley Heat, Euroheat, Franco Belge, Hunter, Morso, Esse, Parkray, Stovax, Tiger & Firefox, Villager and Yeoman Stoves. Our installation area covers the region within about 15 miles of Selby. We can perform installations outside this area on request.
