

At Trevor Steels Trailers we're passionate about designing and constructing sport and leisure trailers to produce a premium range, which is the root of our success. Our products are all designed and manufactured on site in Yorkshire by our professional team ensuring our specialist range of trailers meets the company's standard. Being active in these sports, we are all too aware and appreciate just what's demanded of trailers in this field and that's why we are dedicated and driven to manufacture reliable performance products, substantial and user friendly without compromising distinction and style.

Whilst we offer a comprehensive range, we recognise that customers may have different criteria. It is important to us that we assess and understand each client's individual needs so we offer a one to one consultation, that coupled with our bespoke trailer building service enables us to customise and produce any trailer to meet all requirements and expectations of our client. In October 2012 new legislation came into force regarding trailers. All trailers first used after October 2012 must be approved before they can be used on the road. Each trailer we build is inspected by VOSA and a certificate issued.

Our range includes:-

Canoe Trailers,

Kayak Trailers,

Windsurf Trailers

Mountain Bike Trailers

Allberries Cottage Farm,

Selby Road,

Holme on Spalding Moor,

York,

East Yorkshire
