

Yorkshire stove installer for all your wood burning and multi fuel stove needs.

Offering all the help you need from stove selection through to fitting and maintenance, we aim to be Yorkshire's number one choice for solid fuel appliances. Our service is tailor made to every customer with clear and honest advice. We believe in only the best service and standards of work. We currently have some great offers for stove fitting in Selby and across the whole of Yorkshire and aim to beat any like for like quotation. We are a family run business, fully insured and HETAS registered, and happy to give free surveys and quotes for any building work required along with the fitting of your chosen stove. In addition to supplying and installing Wood burning stoves and multi fuel stoves we also offer services such as chimney lining and fireplace resizing. The main areas we work within include Selby, York, Wetherby, Tadcaster, Leeds, Bradford, Pocklington, Market Weighton, Harrogate, Knaresborough, Castleford, Ripon, Boroughbridge we will also travel throughout Yorkshire and if require anywhere in the UK for larger installations.

In addition to supplying and installing Wood burning stoves and multi fuel stoves we also offer services such as chimney lining and fireplace resizing. If your property lacks a chimney then we can supply a flue for your stove using an external twin wall flue system in either a stainless finish or powder coated black option. Unlike other companies, Yorkshire Stove Solutions do not insist on supplying your stove, although we are happy to supply competitive quotes for supplying and fitting. Selecting a stove can sometimes be confusing but we are always happy to help. A good

place to start is to find out if you live in a smoke control area (your local council should be able to advise you on this). If this is the case you will need a DEFRA approved stove. All stove retailers can offer a selection of these stoves. Stoves are rated by kw output from around 5kw upwards. 5kw stoves require no additional vents to supply air into your property but larger stoves will require greater air supplies to comply with building regulations. Should your fireplace need redesigning to accommodate your new stove, Yorkshire Stove Solutions are happy to offer a resizing service at a great price.

We can discuss your personal requirements and ensure the work is completed to a very high standard that complies with all the relevant building regulations. With our experience we know how to build a fireplace that is not only eye catching but also built to last. With over 25 years combined building experience we understand that regardless of the age of your property the fireplace might not suit your present requirements.
